

Don't let poor quality contaminate your reputation

Competitor's seam welded "sanitary" tubing

Sub-standard quality base metal

RathGibson's seam welded, fully-finished truly sanitary tubing

How "sanitary" is your sanitary tubing? Poor quality welds and base metals encourage contaminate build-up and microbial growth. Trust RathGibson's truly sanitary tubing for food, dairy, and beverage applications.

- All of RathGibson's truly sanitary tubing is manufactured as ASTM A270-S2 directly off our mills, not as industrial grade tubing and polished
- RathGibson's Microweld™ design provides the ultimate corrosion resistance and surface finish consistency
- RathGibson utilizes the industry's finest stainless steel materials made exclusively to our proprietary melt criteria for maximum weldability
- Our Laser & TIG full-finishing welding processes ensure weld seam integrity
- Stringent adherence to ISO 9001:2008
- RathGibson only sells through the sanitary industry's most knowledgeable distributors
- 600,000 feet of inventory available for immediate shipment

For truly sanitary tubing that is backed by our technical expertise and unmatched customer service, insist on RathGibson.
